

SOFTWARE FINANCE

Did you know that we can fund your 100% software projects in full?

Whether you are renewing, upgrading or growing your software estate or deploying a completely new solution you can spread the cost.

Bluestone Leasing are a specialist in software finance, providing exceptional rates and access to the largest funding panel in the UK.

We fund a wide range of software solutions including:

- | | | | | |
|--|---|---|---|---|
| 
Microsoft | 
Virtualisation | 
Security | 
Design | 
ERP |
| 
CRM | 
Networking | 
Bespoke applications | 
Licenses | 
Upgrades |

Match your costs to the return on your investment

With our finance solutions, your costs are fixed for the entire term and you can even spread the VAT too. Software costs are perfect to be spread over time and matched to your usage. Depending on the finance solution suited to your needs, you could even save tax as repayments are fully tax deductible.

Take a strategic approach to your software

Using a finance solution allows you to adopt a strategic approach to your software costs moving forward. Paying small, fixed amounts on a regular basis removes the pain of ad hoc and often large demands on capital in the future.

Don't worry, we can wrap all of your project costs into one facility - complete funding for your entire expenditure.
