

FINANCE FOR TECHNOLOGY

Bluestone Leasing has been providing finance for technology projects since 1996. As the leading UK specialist we have both the experience and expertise to deliver a solution to suit the exact needs of our customers.

TECHNOLOGY AS A SERVICE
IT HARDWARE
SOFTWARE
AUDIOVISUAL
INFRASTRUCTURE

- 1 Specialist Funders**

Our extensive panel of finance companies is focused on funding technology assets. This specialisation ensures that they fully understand the specific nuances of technology and are generally more comfortable funding everything from IT hardware through to pure software solutions.
- 2 Software Only**

Unlike non-specialists, our funders treat software as an asset in its own right. Software includes both recognised off the shelf software products and bespoke/proprietary solutions. In addition to physical licenses and contracts, we are also happy to finance wholly hosted or cloud based solutions.
- 3 Easy "Pay As A Service" Model**

If you are moving your technology provision to either a consumption or subscription model, leasing is the ideal way to deliver it. Package your required hardware, software and services into one easy, regular payment for stress-free management and take pressure off your budgets.

If you have multiple suppliers, no problem. We will arrange for all their costs to be consolidated into one single payment each month, quarter or year as you wish.
- 4 Turnkey Project Funding**

We are experts in securing funding for the entirety of a project, not just the assets in question. Typically we can provide funding for installation, maintenance, support and consultancy services as well. This makes budgeting a simple and easy process, reduces capital outlay and spreads payments over time.
- 5 Independent Expertise & Support**

Independent and impartial, we have a team of industry experts and specialists here to support you every step of the way. Our people will explain your options in clear, simple language and manage the whole process from start to finish.
- 6 Lifecycle Management**

Finance is ideally suited to the lifecycle of technology assets. Costs are spread across the meaningful life of the equipment and your agreements neatly dovetail with the refresh cycle in line with your IT strategy.

Bluestone Leasing can even help your organisation with asset management, end of life equipment remarketing and WEEE compliant disposal as required.
